

CHALLENGES Companies Face

Companies lose 20% - 30% in revenue each year due to operational inefficiency.*

Across all industries, companies face problems with operational processes that are:

- Manual
- Inefficient
- Laborious
- Inflexible
- Costly to Maintain
- Overly Complex
- Redundant
- Antiquated

Versa-Tech Delivers SOLUTIONS

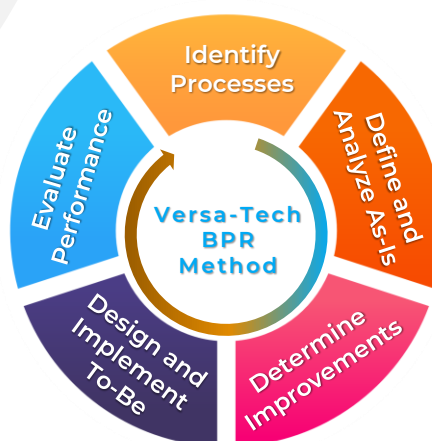

Need to reduce costs? Aspire to scale your business? Want happier employees?

RE-ENGINEER. IMPROVE. AUTOMATE. Versa-Tech helps companies with these numerous challenges by delivering innovative solutions using our proven Business Process Re-Engineering (BPR) method:

Business Process Re-Engineering (BPR)

- Assess current As-Is processes
- Diagnose bottlenecks, gaps, and inefficiencies
- Determine process improvements
- Produce optimized future To-Be process design aligned to business value outcomes
- Evaluate performance improvement metrics

Process Automation

Additionally, through our partnership with **UiPath**, an industry-leading **Robotic Process Automation (RPA) software provider**, **Versa-Tech** can:

- Automate processes intelligently to reduce/eliminate manual intervention for humanly-performed laborious or repetitive tasks
- Simplify and streamline complex processes
- Integrate, retrieve, and compile data from disparate sources

VALUE Outcomes Realized

- Improve process and product quality
- Accelerate speed to market
- Achieve cost savings
- Advance operational productivity
- Increase customer satisfaction and employee morale
- Ensure accuracy and precision of results

Learn more about process automation use cases and how we can implement BPR to transform your specific business functions.

For any industry, a **custom solution** can be integrated with your company's operational environment.
